

DAILY BREEZE in Torrance CA reported meeting re area code 310, led by Rep. Jane Harman. Readres were asked to comment on 2 options, namely limiting numbers companies can hold in reserve, or assigning "fictitious" area codes to technology-specific uses such as ATMs. I recommend using both. If splitting the area eventually still becomes unavoidable, the new code should be assigned to the northern section (Culver City & environs) rather than the South Bay because that would impact far fewer major installations such as the airport, major hospitals, LA port, several colleges & many huge businesses.
